About us

The Mario De Cecco Co. Ltd. is a workwear manufacturer created under the partnership of Eng. Naeem H Al Hemaidi, leader of Maghateer group, and located in the city of Al-Khobar. The firm was born by Mario De Cecco Group, one of the international leader in manufacturing of professional clothing, PPE and promotional garments, with the purpose to bring the Italian design and quality abroad. Thanks to more of 50 years of experience, it stands on market place as total safety provider, able to dress completely and safely every worker.

50 years of family's success

The story of Mario De Cecco SpA is an exciting travel through five decades of activity: a travel under the sign of safety started by Mario De Cecco together with his wife Iolanda, in the early '60s, with the opening of a small but innovative laboratory for the production of work gloves.

To follow the road drawn by Mario, with the same enthusiasm, were his sons Giampiero and Paolo together with their wives and grandchildren. Thanks to the work and intuitions of an entire family, a small but competitive reality has become an international leader, in the production of workwear, professional, promotional and distribution of ppe safety.

Certifications

Mario De Cecco Group has all the most important certifications, including the **ISO 9001** quality certification, the **ISO 14001** environmental certification and the **ISO 45001** safety certification that attests the constant commitment to maintain high standards not only with respect to the production and supply services, but also in terms of protecting the environment and workers.

The Company has also obtained the **SA 8000** and the **STeP by OEKO-TEX®** certifications: the first one ensures the corporate social responsibility; the second one concerns firms operating within the textile industry and allows a comprehensive and reliable analysis of the extent of sustainable management provided by a production facility.

Aside from the system certifications mentioned above, Mario De Cecco Group is also able to produce garments in accordance with **OEKO-TEX® Standard 100**, attesting that the product does not contain any harmful substances for the human health.

Research and development

We believe in guiding our work today by envisioning the future and seeking continuous improvement. That is why the R&D department is continuously looking for new solutions that combine workers' protection and safety with other essential aspects such as comfort, performance, and sustainability. We focus on finding innovative fibers and fabrics: those suitable for nanotechnology integration, others that offer protection from viruses and bacteria, and those designed to offer a perfect fit. Our research has recently been dedicated to sustainability: studying the efficacy of biodegradable and compostable fibers and manufacturing garments that reduce energy and water consumption and contribute to the development of a circular economy.
